DETAILED ACTION

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David Hill on 5/16/2007.

The application has been amended as follows:

--Claim 12 have been canceled

Allowable Subject Matter

Claims 11, 13-20, 41-56 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art taken either singularity or in combination fails to anticipate or fairly suggest the limitations of the independent claim, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claims 11, 41, with the allowable features being; the conditional formula pertaining to the rate of change of a third order spherical aberration of the objective lens(claim 11); the

Art Unit: 2873

conditional formula pertaining to the distance between the light side optical lens per the focal length of the lens system (claim 41). Therefore claims 11, 13-20, 41-56 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
